Subject: RE: Getting to the RCRA Post Closure Plans

Either Wednesday, 9/10 or Thursday 9/11 10A PDT/11A MDT/1P EDT works for Rob and me. Only Rob and me.

Let me know and I'll send a dial in.

We should probably try to schedule a call to discuss. Please suggest some available dates/times.

Subject: Getting to the RCRA Post Closure Plans

Barbara – I have a few notes from the work Carla completed on the RCRA Post Closure Plans but it would be very helpful if you can tell me what document I should be looking at (do you have an electronic doc?), where you think things are on the final post closure documents, and your perspective on what needs to be done at this point. I understand Andy and Carla were working through the type of document (permit vs use of the post closure rule), and that the gw monitoring probably needs to be revised. I am not sure if this is one long call or an assortment of calls but if you can spare some time so I know where to begin. I hope to focus on this over the next 2 months and get something ready for public notice by the end of the calendar year. Does that seem reasonable? I know you have the SF remedy starting up so understand if the timing is not the best but I was hoping to start this before the site visit at the end of Sept. Thanks in advance for your help. I will not be available tomorrow or Friday.

Regarding approval of the slag pit sump closure. I have a message out to Kelly to see if the Tribe has comments. I requested their comments by Friday 8/29. According to 265.118(d) we will have to approve any change to the PC plan. I have no comments with your proposal, just waiting to see if the Tribe has any concern.

Subject: RCRA Pond UAO Weekly Reports #211 - August 18 - August 24, 2014

Greg,

As you had directed, FMC is providing a weekly report, pursuant to the RCRA Pond UAO, describing field activities conducted pursuant to work plans you have approved.

Work Performed this week:

- Continued implementation of the RIWP and 12/7 operation of one GES unit at the east perimeter standpipe on Pond 18A.
- Continued implementation of gas extraction at Pond 15S, consistent with the Pond 15S RIWP submitted on 6/10/14, on a 12/7 schedule using five GES units extracting at the southwest standpipe and one GES unit extracting from the east standpipe at Pond 15S.
- Continued continuous monitoring at three Pond 18A boundary locations and four 15S boundary monitoring locations during periods of gas extraction. There were no TWA or maximum values above the thresholds specified in the Air Monitoring Plan. A spreadsheet summarizing the results of this monitoring to date is attached.
- Other than continuous monitoring at Ponds 15S and 18A, no monitoring was performed or required pursuant to the approved work plans during the reporting period.

Problems Encountered:

None.

Unplanned Events Encountered:

None.

Work to be performed the following week:

- Continue implementation of the IWP and 12/7 operation of one GES unit at the east perimeter standpipe on Pond 18A.
- Continue implementation of gas extraction at Pond 15S, consistent with the Pond 15S RIWP submitted on 6/10/14, on a 12/7 schedule using five GES units extracting at the southwest standpipe and one GES unit extracting from the east standpipe at Pond 15S.
- Other than continuous monitoring at Ponds 15S and 18A, no monitoring is required to be performed pursuant to the approved work plans.
- Begin to compile monitoring data for submittal in monthly report 9/3/14 and discussion in conference call scheduled for 9/9/14 at 9A PDT/10A MDT/noon EDT.
